

Everything old is new  
again (ish)

OpenCore Legacy Patcher for fun and profit

This is all Tom Bridge's fault...

**The year is 1999**

And in 2005?

What about in 2024?

## OpenCore Legacy Patcher

experience macOS just like before

[Getting Started →](#)

Native OTA updates      Zero firmware patching      Supporting more hardware

Tu

a

So if someone else can write  
drivers for the missing hardware...

But we still need to get these  
new community provided drivers  
installed

Say Hello to OpenCore...

...but what IS OpenCore?

*Are we the baddies?*

# OpenCore Legacy Patcher

Experience macOS just like before

Getting Started →

Native OTA updates

Zero firmware patching

Supporting more hardware

So then... how is OpenCore Legacy  
Patcher different from OpenCore?

A close-up photograph of a circular red button with the word "easy" printed in white, lowercase, sans-serif font. The button is mounted on a silver-colored metal base. The background is a plain, light-colored surface.

easy

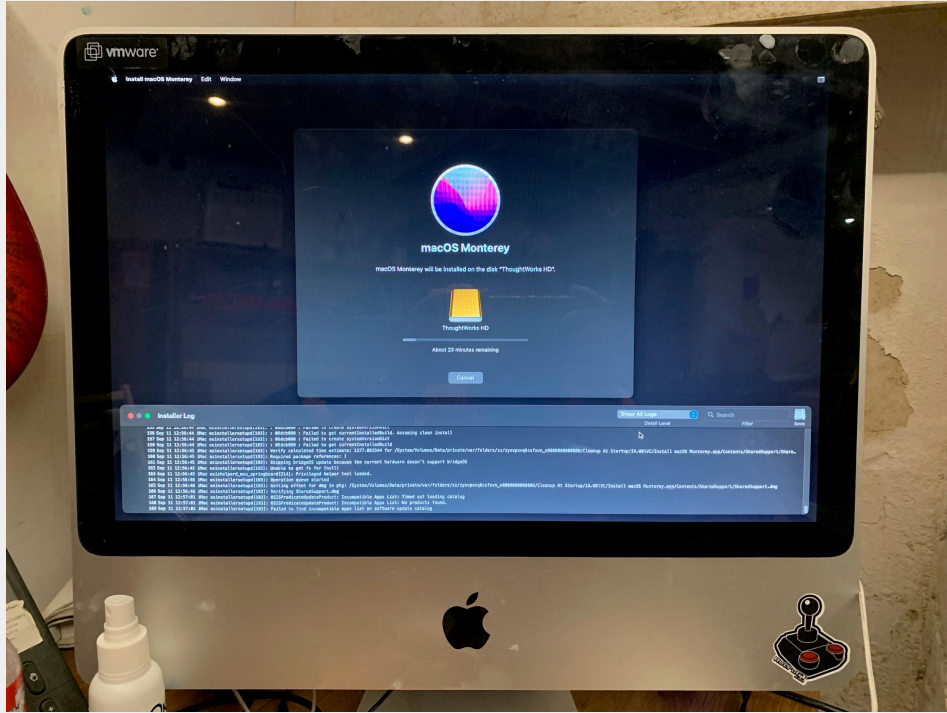

**YO DAWG  
I HEARD YOU LIKE MACINTOSH**

**SO WE INSTALLED A BOOTLOADER  
TO RUN A HACKINTOSH ON YOUR MACINTOSH**

My adventures in OCLP

Installed on  
an SSD in a  
USB drive  
caddy

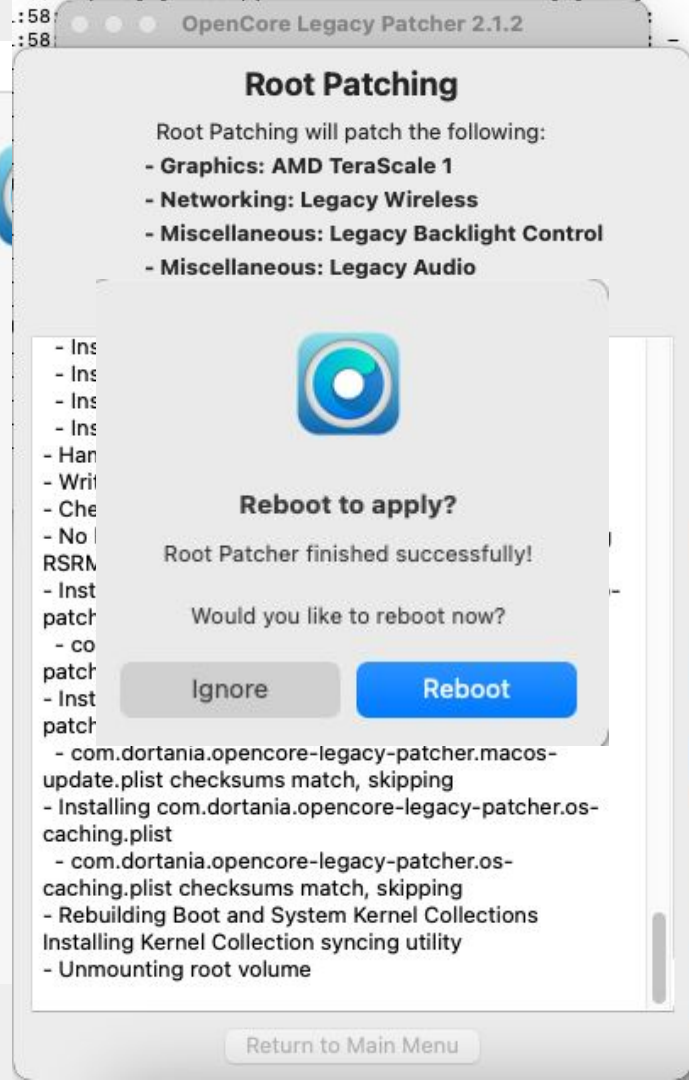

I'm sure you  
can imagine  
how snappy it  
was...

Cracked the  
case, fitted  
the drive  
internally...

Living with  
it?

Please reboot the machine for patches to take effect
```

Should you do this?

Should you do this in production?

Coda

Fine. I caved and bought a new  
Mac Mini M4.

yesterday...

(but these slides were mostly made on a 2008 iMac...)

# Thanks

 @squirke
